High Performance Industrial Markers

**PRESSMARKER™**  
Fine Bullet-Tip  
Permanent Marker

**HIGHLY-VISIBLE  
FAST DRYING  
MARKING!**

*Permanent ink won't smear.*

**Introducing the new Markal® PRESSMARKER™!  
Ideal for use in the installation of press-fit  
connection plumbing systems.**

The PRESSMARKER™ by Markal® permanent ink marker with fine bullet tip has been designed to provide long-lasting, highly visible marks especially for use on press-fit plumbing connections. These systems are effective and convenient, but without accurate depth marking as required by all manufacturers during installation, expensive re-work may be needed. With a durable barrel, and long-lasting fine tip, the PRESSMARKER is the ideal choice to accomplish this and other jobs when durability and accuracy are needed. Our long-lasting, industrial-grade ink writes on almost any surface and texture, and our low chloride/low halogen formula makes it safe for almost any surface including all plastics, copper, and stainless steel.

**FEATURES:**

- The highly durable, fine, bullet tip provides consistent and highly-visible marking every time when accuracy is most important.
- Our fast drying, industrial grade, permanent ink won't smear and will remain highly visible even on hot or cold pipes.
- With a water-resistant ink, marks will not fade or wear on moist surfaces.
- The low chloride/low halogen formula will mark and is safe for use on almost any surface and will not corrode plastics, copper, or stainless steel.
- A lightweight yet highly durable barrel and cap holds up better in the toughest applications.
- Available in cases of 36, 3-pack blister cards.
- Temperature range: 0°F to 100°F (-18°C to 38°C)
